EXPERIENCE

Software Engineer

AFKart Ventures Inc. • Part-Time

March 2025 - December 2025 • 10 months

- Built custom Shopify themes using Liquid and React.js, creating storefronts aligned with brand requirements and improving the user experience across devices.

Senior Front-End Developer

Cubework.com PH Corp. • Full-time

September 2024 - January 2025 • 5 months

- Developed a Flutter application from the ground up for Android and iOS, applying industry best practices to deliver maintainable, scalable, and production-ready mobile features that met company requirements.
- Contributed to an admin panel built with React and Python by building and improving UI components, enhancing usability and supporting smoother workflows for internal users.
- Collaborated with clients, project managers, and developers to define project scope, refine goals, and plan sprints, supporting smoother coordination and more predictable delivery timelines.
- Led a small team of junior and mid-level developers, encouraging collaboration through code reviews, knowledge-sharing and discussions for technical decisions and implementation.

Software Engineer

Mochi Solutions • Full-time

March 2024 - August 2024 • 6 months

- Improved the usability of existing Next.js components by implementing mobile-responsive layouts, leading to smoother interactions and consistent behavior across a wide range of screen sizes.

Software Engineer

Proudcloud Inc. • Full-time

February 2021 - March 2023 • 2 years, 1 month

- Implemented user interfaces in Next.js, React.js, React Native and Ruby on Rails using responsive, cross-browser best practices, improving UI consistency and reducing front-end styling issues.

UI/UX Designer

Proudcloud Inc. • Full-time

March 2017 - September 2018 • 1 year, 7 months

- Designed and redesigned user interfaces for web applications by producing mockups and prototypes, ensuring clearer visual direction and a more efficient development workflow.
